

Use the corner cannon on **EVEN NUMBERED** hoops, when the next hoop in order is to the side. In this diagram, we are looking at hoop 2.

First, one of your balls goes into the jaws. Only do this when the hot ball cannot jump or dislodge you.

Next, if your other ball has a decent shot at the hoop and is sitting at any angle opposite to the direction of the next hoop, you hit the ball in the jaws on the side of that ball closest to the next hoop.

Your goal is to knock your ball in the jaws through the hoop, and for the ball you just hit to go in a direction toward the next hoop. You are legally off-side because you scored on the shot!
