

# When does your Golf Croquet Handicap Change?

**Your handicap changes** as soon as your index reaches a trigger point given in **Table A** which corresponds to a handicap different to your current handicap.

*Copied from the Index card*

*An example:*

If your handicap is 9 and your index goes from 194 to 204, you have passed the trigger point for a handicap of 8, which becomes your new handicap. If you lose your next game and your index passes through 200 again to 194 your handicap will not change as this is the trigger point for your current handicap. Your handicap would not change back to 9 until your index reaches 150, which is the trigger point for a 9 handicap.

**A 10 H/C** changes to 9 when the index reaches 150 or more.

**A 9 H/C** remains as 9 as long as the index is in the range 101 to 199  
But changes to 10 if the index drops to 100 or 8 if the index reaches 200

**An 8 H/C** remains as 8 as long as the index is in the range 151 to 249  
But changes to 9 if the index drops to 150 or 7 if the index reaches 250

**A 7 H/C** remains as 7 as long as the index is in the range 201 to 299  
But changes to 8 if the index drops to 200 or 6 if the index reaches 300

**A 6 H/C** remains as 6 as long as the index is in the range 251 to 349  
But changes to 7 if the index drops to 250 or 5 if the index reaches 350

**A 5 H/C** remains as 5 as long as the index is in the range 301 to 399  
But changes to 6 if the index drops to 300 or 4 if the index reaches 400

**A 4 H/C** remains as 4 as long as the index is in the range 351 to 499  
But changes to 5 if the index drops to 350 or 3 if the index reaches 500

**A 3 H/C** remains as 3 as long as the index is in the range 401 to 649  
But changes to 4 if the index drops to 400 or 2 if the index reaches 650

**A 2 H/C** remains as 2 as long as the index is in the range 501 to 799  
But changes to 3 if the index drops to 500 or 1 if the index reaches 800

**A 1 H/C** remains as 1 as long as the index is in the range 651 to 999  
But changes to 2 if the index drops to 650 or 0 if the index reaches 1000

**A 0 H/C** remains as 0 as long as the index is 801 or more  
But changes to 1 if the index drops to 800
